

# AW TRAILERS

## Removable Sides

Removable sides are available across the Monocoque and Potato & Root ranges (including 'Ultima' models). They are particularly suitable for the Potato & Root models as they allow the trailer to be used for carrying potato boxes.

The headboard is permanently fixed to the trailer for strength. The sides have an RHS box top and bottom with an RHS rear corner post which locates in the trailer bed.

The sides are fitted with 2 removable lifting loops on the top to enable them to be lifted off by a loader or forklift. When re-fitting, the sides are easily located into the correct position by the tab and socket arrangement as shown above. Once in the correct position the sides are simply bolted into place to both the trailer bed and the headboard giving a strong, rigid body.
