## Fuel Cube

Storage capacity is at a minimum with 'TRANS CUBES'

Transporting fuel means power deployment is so quick with 'TRANS CUBES'

On-site refuelling with 'TRANS CUBES'

Site tow 'S20TC'

Yes it is perfectly legal with 'TRANS CUBES'

From May the 10<sup>th</sup> 2004 all tanks used on road transport must comply to ADR requirements. This range is built to (IBC) Intermediate Bulk Container standards with unique ease of maintenance features including removable inner tank (on Transcube) and inspection chambers.

The Abbi and Transcube range feature 110% bund capacity of inner containers and pump/outlet housed in bund area. Complies with PPG2 (Pollution Prevention Guidelines). Another feature that helps us keep a clean environment, all inlets and outlets mounted at the top of the tank just in case of a pipeline failure.

## 'ABBI' Bowser

500-900 litre highway tow 'ABBI' range

900kg/1500kg a light weight advantage

For those high capacity jobs use 'POMPIT'

## Static Bunded Tanks

1100-4550 litre 'Enviro-Bulkas' range

**BS799**  
PART 5

2200 litre low level waste oil tanks

**BS799**  
PART 5

The Static tank range are built to BS799 part 5, 3mm minimum thickness tank and bund. A bit over the top on spec' but....

BM TRADA  
CERTIFICATION  
ISO 9001

UKAS  
QUALITY  
MANAGEMENT  
012

To keep peace of mind the ISO 9001 2000 quality control system is in place to respond successfully to customer feed back.

2000 Litre 'STANDBY' has a dimensional advantage
